Remove this

Join thousands of students and creators growing with ScaleAIQ.

Remove this as well because it's just started no clear data.

For this one I want to be done through admin panel, so give space for reviews and ask visitors to leave their comments even without sign in, so as they put words it lands on my admin panel I approve it.

I am sure this is properly aligned not just placeholders. Also want social media icons with active icons. Keep Instagram, Whats app for now.

Also , I need join our community tab linked with my whats group so anyone can join from it. Decide the correct place for it.

Why ebook not coming. Also if something is not available there should be coming soon and notify me button for all the things. Even for future stuff coming as coming soon feature.

Remove all dummy product count this would be linked to real data. So once I add it will show real picture

Same way from products, remove reviews data. This will also linked to real purchaser review.

For all the pages including admin panel there should be light blue color background and not simple white. As it's not looking good professional.

And I also want icons on all pages wherever possible, including admin panel and sign in, check out all pages. You can take inspiration from market place sites like this. I want it like if someone land they will it as professional not simple , and good interface with fast responsive.
